CLEANERS

Beneath your feet,
spotless water.

Choosing the right cleaner with Zodiac[®]

Wind, dust, plants...

The water in your pool is an element which lives at the pace of its environment. Making it dazzlingly clean requires less maintenance than you think, provided you have the equipment to match its size and layout.

Zodiac® helps you choose the cleaner you need.

Are you looking for a simple and affordable solution?

THE RIGHT CHOICE Zodiac® hydraulic cleaners

Hydraulic cleaners are installed on the swimming pool filtration system, using power from its pump to operate. Depending on the model, they are based on two types of technology: suction or pressure. Suction cleaners capture debris by suction and store it in the pre-filter of the pump, while pressure cleaners, more sophisticated and faster, have their own filter basket. In all cases, these systems are particularly suitable for pools with a flat bottom or gentle slope.

Are you looking for an independent and efficient solution?

THE RIGHT CHOICE Zodiac® electric cleaners

Electric cleaners concentrate the best of Zodiac® technology and offer the most demanding swimming pool owners the fastest and most efficient cleaning. Independent of the filtration system, this plug&play equipment is autonomous and traps dirt in its own filter basket. Equipped with real artificial intelligence, they get into all recesses of the pool climb the walls, clean the water line and are available in different models for all types of pools.

WORTH KNOWING

Electric cleaners represent a more expensive investment than hydraulic cleaners. But their speed and quality performance for complete cleaning (floor and walls) up to the water line meet the most demanding standards.

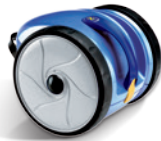

ZODIAC® VORTEX™ ELECTRIC CLEANERS

THE POWER OF CYCLONIC SUCTION

Vortex™ is exclusive Zodiac® technology that creates a high power vortex inside the filter. The cyclonic suction is constant throughout the cleaning cycle and debris is kept permanently in suspension, which avoids clogging the filter.

Result: no loss of suction

Vortex™ 1

The most compact cleaner

in the Vortex™ range Its small footprint and light weight make it easy to handle and store. Fitted with a built-in mini-brush and filter basket, the Vortex 1™ cleans the floor of your swimming pool perfectly, while using only a minimum of power.

Vortex™ 2

The best value for money in its class,

which can clean and brush the floor of your pool, as well as the walls and the water line, in 2h30. It is also fitted with an easily-accessible filter basket for rapid cleaning without coming into contact with the dirt.

Vortex™ 3

The reference for electric cleaners,

with 2 cleaning cycles (floor only in 1h30; floor, walls and water line in 2h30), an easily-accessible filter basket for rapid cleaning without coming into contact with dirt and a transport and storage trolley.

Vortex™ 3.2

The reference in cleaning,

easier to use. Vortex™ 3.2 includes the Zodiac® Lift System innovation that, by activating a powerful rear jet when taking it out of the water, requires 20% less effort to remove the cleaner from the swimming pool. It also has an XXL 5 litre filter basket that is easy to empty, with an extra wide suction inlet. Vortex™ 3.2 suits all shapes of pools (up to 12 x 6 m) and all floor types.

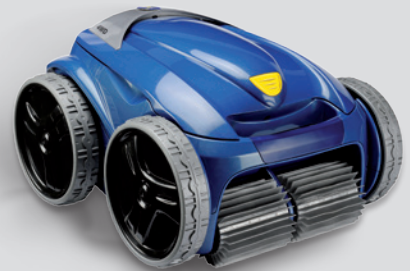

Vortex™ 3 4WD

The first 4-wheel drive cleaner,

which offers perfect grip on all types of linings and provides unique cleaning speed and efficiency.

It has a transport trolley and is fitted with the Zodiac® Lift System innovation, which reduces the effort needed to take it out of the water by 20%. Can be programmed for 7 days. 2 cleaning cycles (floor only in 1h30; floor + walls + water line in 2h30).

Vortex™ 4 4WD

The first remote control 4-wheel drive cleaner,

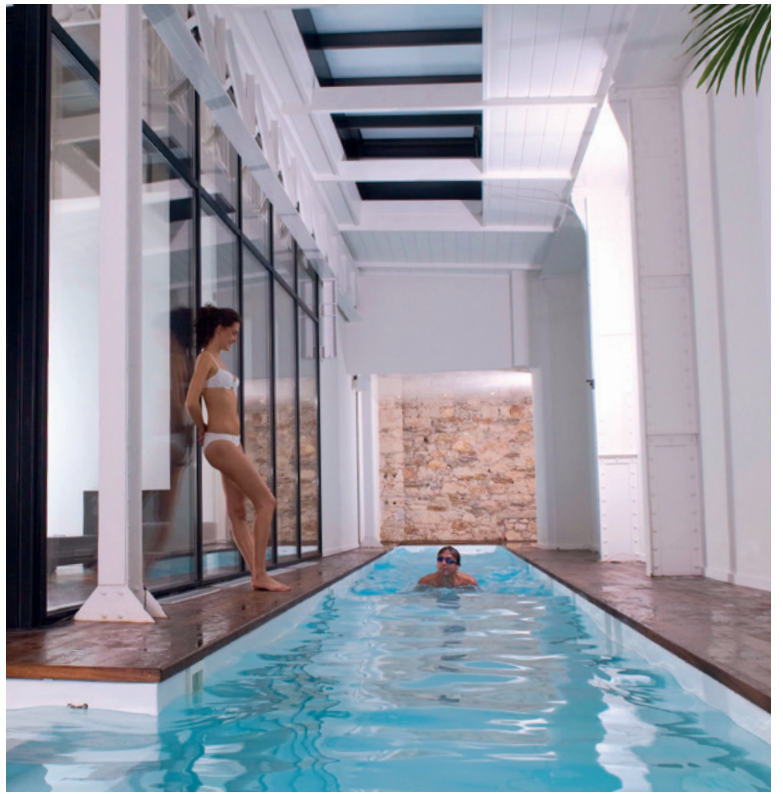

able to get past obstacles and grip all floor types, for immaculate cleaning of all shapes of pools (30% more suction than the average for other electric cleaners).

Vortex™ 4 4WD concentrates all Zodiac® technology: it is equipped with the Lift System function (20% less effort to take it out of the pool), a control unit offering numerous programming options, a filter-full indicator and a Kinetic remote control to guide the cleaner using a simple wrist movement. Supplied with a transport trolley.

Make the right choice

Numerous parameters affect the choice of your cleaning equipment: filtration quality, shape and size of the pool, number of skimmers, presence of corners and recesses, main or holiday home... Depending on the special features of your pool, your budget and the time you have available for cleaning, you will be able to define your real needs.

ZODIAC® ACCESSORIES FOR YOUR CLEANER

Protective cover

60, 100 and 200 micron filters

ZODIAC® RECOMMENDATION

For your cleaner to keep its cleaning ability year after year, Zodiac® recommends cleaning the filter basket at the end of each cycle and changing brushes at the end of the season.
